

Siracusa. Eclissi anulare di Sole: immortalata la fase parziale

Lo spettacolo dell'eclissi anulare di Sole visto da Siracusa e immortalato da Salvo Lauricella. Le immagini compongono una sequenza della fase parziale dell'eclissi, visibile nell'Italia meridionale a sud della latitudine 43° N circa. "In particolare, nella nostra penisola sono state favorite le località all'estremo sud-est quindi anche Siracusa", spiega Lauricella che ha utilizzato un telescopio solare dedicato.
